## V4055A,B,D,E On-Off Fluid Power Gas Valve Actuator

## APPLICATION

The V4055 Gas Valve Actuator, in combination with a VE5000 ${ }^{\text {a }}$, V5055 or V5097 Gas Valve, controls the gas supply to commercial and industrial burners.

When replacing a V4034 with a V4055, the V5034 gas valve must also be replaced with a V5055 or V5097 gas valve.

## FEATURES

- The V4055 Actuator, when used with the VE5000 ${ }^{\text {a }}$, V5097 or V5055 Valve, is rated for final safety shutoff service.
- The V4055 Actuator can be used with the characterized guide model of the V5055 or V5097 Gas Valve to enhance lightoff smoothness.
- The standard model has an opening time of 26 seconds at 60 Hz or 32 seconds at 50 Hz . A fastopening model is available with timings of 13 seconds at $\mathbf{6 0 ~ H z}$ or 16 seconds at 50 Hz .
- Maximum closing time is one second, which meets code, standard and insurer requirements.
- Models available with damper shaft, with or without spring return; shaft extends out both sides and rides in Teflon-like Delrin bushings; used with standard 7616BR Damper Crank Arm.
- Red OPEN indicator attached to actuator stem shows when valve is even slightly open; yellow SHUT indicator on valve stem shows only when gas valve is fully closed.
- Models available with adjustable max flow limit switch.
- Ambient temperature rating is $-40^{\circ} \mathrm{F}$ to $+150^{\circ} \mathrm{F}\left(-40^{\circ} \mathrm{C}\right.$ to $+66^{\circ} \mathrm{C}$ ) for 60 Hz models and $-10^{\circ} \mathrm{F}$ to $+158^{\circ} \mathrm{F}\left(-23^{\circ} \mathrm{C}\right.$ to $+70^{\circ} \mathrm{C}$ ) for 50 Hz and $50 / 60 \mathrm{~Hz}$ models.
- Valve and actuator combinations can be mounted in any position, with the exception of the 220 to 240 Vac, $50 / 60 \mathrm{~Hz}$ models, which are mounted vertically.
- Models available with factory-installed single pole double throw (spdt) field-adjustable Auxiliary Switch. Field-addable Auxiliary Switch kits are also available.
- Standard enclosure meets NEMA 1 (IP30) requirements; models available with NEMA 4 (IP54) weatherproof enclosure.
- V4055D and high pressure V4055E with Proof-ofClosure Switch and V5055/V5097C or E with valve seal overtravel interlock (double seal) to meet specific code, standard and insurer requirements.
a VE5000 is a European manufactured and approved valve for European use only.

## SPECIFICATIONS

## Models:

V4055A Actuator, with V5055, V5097 or VE5000 Gas Valves, provides on-off control of fuel. With proper adapter (see Accessories), it replaces the V4034 Actuator on a V5034 Gas Valve.
V4055B Actuator is a high pressure version of V4055A.
V4055D Actuator is identical to V4055A, except has a Proof-of-Closure Switch. Used with V5055C/V5097C (double seal) for valve seal overtravel interlock.
V4055E Actuator is identical to V4055B, except has a Proof-of-Closure Switch. Used with V5055E/V5097E (double seal) for valve seal overtravel interlock.
NEMA 4 weatherproof models available.
Nominal Opening Time: See Table 1.

Table 1. Nominal Opening Time (seconds).

| Model | $\mathbf{5 0 \mathbf { H z }}$ | $\mathbf{6 0 ~ H z}$ |
| :--- | :--- | :--- |
| Standard | 32 | 26 |
| Fast-opening | 16 | 13 |

Maximum Closing Time: One second when de-energized.

## Ambient Operating Temperature Ratings:

60 Hz Models: $-40^{\circ} \mathrm{F}$ to $+150^{\circ} \mathrm{F}\left(-40^{\circ} \mathrm{C}\right.$ to $\left.+66^{\circ} \mathrm{C}\right)$.
$50 \mathrm{~Hz}, 50 / 60 \mathrm{~Hz}$ Models: $-10^{\circ} \mathrm{F}$ to $+158^{\circ} \mathrm{F}\left(-23^{\circ} \mathrm{C}\right.$ to $\left.+70^{\circ} \mathrm{C}\right)$.
Mounting: V4055 Actuator attaches directly to V5055/V5097 Valve with two sets of screws positioned 90 degrees apart.
Combination is multipoise.
NOTE: 220 to 240 Vac, $50 / 60 \mathrm{~Hz}$ models are vertical mount only.

Pressure Ratings: See Table 2.
Table 2. Pressure Ratings of Valve-Actuator Combinations.

| Valve | Actuator |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | V4055A, ${ }^{\text {a }}$ |  |  |  | V4055B, $\mathrm{E}^{\text {a }}$ |  |  |  |
|  | Differential ${ }^{\text {b }}$ |  | Closeoff ${ }^{\text {c }}$ |  | Differential ${ }^{\text {b }}$ |  | Closeoff ${ }^{\text {c }}$ |  |
|  | psi | mbar | psi | bar | psi | mbar | psi | bar |
| V5055/V5097A, C: 3/4 to 3 in. | 5 | 340 | 15 | 1 | 15 | 1000 | 15 | 1 |
| V5055A,C: 4 in. | 3 | 200 | 15 | 1 | 5 | 340 | 15 | 1 |
| V5055/V5097B: 3/4 to 3 in. | 5 | 340 | 15 | 1 | 15 | 1000 | 15 | 1 |
| V5055B: 4 in. | 3 | 200 | 15 | 1 | 5 | 340 | 15 | 1 |
| V5055/V5097D,E: 3/4, 1-1/4, 1-1/2 in. | 5 | 340 | 75 | 5 | 25 | 1700 | 75 | 5 |
| V5055/V5097D,e: 2, 2-1/2, 3 in. | 5 | 340 | 45 | 3 | 15 | 1000 | 45 | 3 |

${ }^{\text {a }}$ Use a V4055D or V4055E (with Proof-of-Closure Switch) with a V5055/V5097C or V5055/V5097E (with double seal) for valve seal overtravel interlock.
${ }^{\mathrm{b}}$ Maximum operating pressure differential.
${ }^{c}$ Maximum closeoff pressure without seat leakage. This is the maximum valve pressure drop allowed while fully closed, and is independent of the valve body rating.

Electrical Ratings: See Tables 3 and 4.

## ORDERING INFORMATION

When purchasing replacement and modernization products from your TRADELINE® wholesaler or distributor, refer to the TRADELINE® Catalog or price sheets for complete ordering number.

If you have additional questions, need further information, or would like to comment on our products or services, please write or phone:

1. Your local Honeywell Automation and Control Products Sales Office (check white pages of your phone directory).

## Approvals:

Underwriters Laboratories Inc. Listed: File No. MH1639, Guide No. YIOZ.
Factory Mutual: Approved.
International Approval Services (Joint Venture of the American Gas Association [AGA] and the Canadian Gas Association [CGA]): Certified 60 Hz models only.
Industrial Risk Insurers: Acceptable.
Some V4055 Actuators are approved as Class A valves in accordance with EN161:
When used with V5055 Valves: Pin: CE-0063AR1359. When used with VE5000 Series Valves: Pin: CE0063AP3075.

## Accessories:

133568 Auxiliary Switch Bag Assembly (not for models with maximum flow limit switch).
133569 Valve-Closed Indication Switch Bag Assembly.

7616BR Damper Crank Arm (damper arm and clip).
Available Models: V4055 with NEMA 4 enclosure (weatherproof).

NOTE: Check local codes for acceptance of adding the switch and using the valve seal overtravel V5055C or V5055E valves.

## INSTALLATION

## When Installing This Product...

1. Read these instructions carefully. Failure to follow them could damage the product or cause a hazardous condition.
2. Check the ratings given in the instructions and on the product to make sure the product is suitable for your application.
3. Installer must be a trained, experienced flame safeguard control technician.
4. After installation is complete, check out product operation as provided in these instructions.

## A WARNING

Electrical Shock Hazard. Can cause serious injury or death.
Disconnect power supply before making wiring connections to prevent electrical shock and equipment damage.

## IMPORTANT

1. All wiring must comply with all applicable electrical codes, ordinances, and regulations. All wiring must be NEC Class 1.
2. Voltage and frequency of the power supply connected to this control must agree with those marked on the device.
3. Loads connected to the Auxiliary Switch and/or Proof-of-Closure Switch, if used, must not exceed the ratings given in the Specifications section.

## Install Valve

The actuator is mounted directly on the valve bonnet after the valve is installed in the gas supply line. Refer to the instructions packed with the gas valve for installation details. When installing the gas valve, make sure:

1. Sufficient clearance is left to install and service the actuator.
2. Ambient temperatures at the valve location do not exceed actuator ratings. See Specifications section.
3. Position of the valve permits hookup to the damper if one is controlled.

## Install Accessory Switches (If Needed)

An spdt switch can be installed to operate an auxiliary load up to $1 / 2 \mathrm{hp}(0.37 \mathrm{~kW})$. See Table 5. The switch can be adjusted to operate at any point in the valve stroke.

A Proof-of-Closure Switch can also be installed with a V5055/ V5097C or E Valve (with double seal) on any V4055 Actuator to provide a valve seal overtravel interlock. The spdt Proof-of-Closure Switch is installed to make or break a circuit when the valve is in the closed position. The switch is not adjustable.

NOTE: Mark the actuator or valve to indicate any changes made.

To install the switches:

1. Remove the actuator faceplate (two screws).
2. Remove the silver-colored barrier to expose the actuator stem.
3. Insert the Auxiliary Switch in the position indicated in Fig. 2. Fasten with two screws through the actuator base.
4. Insert the Proof-of-Closure Switch in the position shown in Fig. 2. The switch mounts against the side of the actuator housing. The mounting holes are spaced to assure mounting the switch in the correct position. Fasten with two screws through the actuator base. (The Proof-of-Closure Switch is not adjustable.)
5. If only one switch is used, install the narrow barrier included with the switch in the unused space.
6. Mount the actuator before making wiring connections and adjustments to the Auxiliary Switch.

## Mount Actuator on Valve

1. Check the final position of the valve body to be sure that the actuator is in the proper position when mounted on the valve. This is especially important when the actuator is used to drive a damper.
2. If two smaller sized valves are mounted very closely together, as in an Industrial Risk Insurers approved type of valve train, it may be necessary to mount the actuators off center to provide adequate clearance.

Fig. 2. V4055 Actuator with cover removed.
3. Slip the bottom collar of the actuator over the valve bonnet assembly. Rotate the actuator to the desired position and use a $5 / 32 \mathrm{in}$. Allen wrench to securely tighten the two setscrews to 50 to $60 \mathrm{lb}-\mathrm{in}$. ( 5.7 to $6.8 \mathrm{~N} \cdot \mathrm{~m}$ ).
4. Connect the damper linkage, if used. Refer to the instructions packed with the damper arm.

## Mount and Adjust 7616BR Damper Crank Arm (If Used)

## IMPORTANT

When a damper crank arm is used with a NEMA 4 actuator that is exposed to ice or sleet, a suitable shield must be installed to prevent ice or sleet buildup.

Follow installation and adjustment directions included with damper crank arm. Maximum pushrod travel is 2-5/16 in. $(59 \mathrm{~mm})$ through a stroke of 52 degrees. See Fig. 3.

Fig. 3. 7616BR Damper Crank Arm can be attached to actuator shaft to drive a damper when valve is open.

## WIRING

## A WARNING

Electrical Shock Hazard.
Can cause serious injury or death.
Disconnect power supply before making wiring connections to prevent electrical shock and equipment damage.

Wiring must comply with all applicable electrical codes, ordinances and regulations. Wiring to the actuator must be NEC Class 1.

Connect the power supply to terminals 1 and 2 on the V4055 terminal strip. Refer to Fig. 4 for Auxiliary Switch connections and Fig. 5 for Max Flow Limit Switch connections. For typical system hookups, refer to Fig. 6 and to instructions packed with the device used to control the valve.

When all wiring connections are complete, replace the actuator faceplate.

## - CAUTION

## Operation Hazard.

Improper wiring can cause improper and dangerous operation.
Label all wires prior to disconnection when servicing valves. Wiring errors can cause improper and dangerous operation.

NOTE: Pipe sealant is required on the conduit threads of actuators with NEMA 4 enclosures.

## Adjust Auxiliary Switch (If Used)

The Auxiliary Switch is adjustable throughout the stroke of the actuator. With the switch installed in the actuator, turn the adjusting screw (see Fig. 2) clockwise $\curvearrowright$ to cause the switch to operate earlier in the stroke or counterclockwise $\curvearrowleft$ to cause the switch to operate later in the stroke.

POWER SUPPLY. PROVIDE OVERLOAD PROTECTION AND DISCONNECT MEANS AS REQUIRED.

SWITCH BETWEEN THESE TWO LEADS IS CLOSED WHEN VALVE IS SHUT (DE-ENERGIZED).
switch between these two leads is open when VALVE IS SHUT (DE-ENERGIZED). M7334

Fig. 4. External connections to the V4055 Actuator.

Fig. 5. Connecting the Max Flow Limit Switch to the actuator.

NOTE: The Proof-of-Closure Switch is not adjustable.

## Adjust Max Flow Limit Switch (If Used)

The Max Flow Limit Switch is adjustable throughout the stroke of the actuator. With the switch installed in the actuator, turn the adjusting screw clockwise $\curvearrowleft$ to cause the switch to operate earlier in the stroke or counter-clockwise $\curvearrowleft$ to cause the switch to operate later in the stroke.

## CHECKOUT AND SERVICE

## $\triangle$ CAUTION

Equipment Damage Hazard.
Unskilled technicians can cause equipment damage.
Only a trained, experienced, flame safeguard technician should check out and service this control.

## Checkout

After the installation is complete, cycle the valve several times with the manual fuel shutoff cock closed before testing the system in actual operation.

## Service

The actuator is not field repairable except for replacing the Auxiliary Switch, Max Flow Limit Switch or Proof-of-Closure Switch. See Installation section for procedure. Do not disassemble the valve actuator.

If the actuator fails to operate properly, replace it.

1. Turn off the gas supply at the manual shutoff valve located upstream from the valve(s) being serviced.
2. Shut off all electrical power to the valve actuator(s).
3. Mark and disconnect the wires from the actuator terminals. Remove conduit and disengage the damper linkage assembly (if applicable).
4. Loosen the two set screws from the valve to lift off the actuator.
5. If the actuator is to be replaced and it did not leak hydraulic fluid, skip to Step 11.

NOTE: It is good practice to inspect the inside of the valve whenever the actuator is replaced. To do so, remove the bonnet assembly, inspect the valve and bonnet. If all is well, proceed to Step 7.
7. If the valve bonnet assembly is in good condition and is not replaced, replace the bonnet seal. Do not reuse the old bonnet seal. See Table 9 below for the seal number.
8. Coat seals with grease provided and position in valve body/bonnet assembly.
9. Carefully seat the bonnet assembly on the valve body. Be sure the seals are in their proper position. On those valves with a spring below the disc, be sure the spring is centered in the indentation on the inside of the valve body.
10. After positioning the bonnet assembly, replace the screws removed earlier.

NOTE: When replacing the bonnet assembly on the 4inch valve, draw it evenly into the valve body. Finger-tighten the eight bolts. Draw the bonnet assembly into the valve by tightening, in order, bolts 1,5, 7 and 3 (two turns each). Repeat until the bonnet assembly is seated. Tighten the remaining bolts. Torque the bolts as follows:

| Valve Size | Torque |
| :--- | :--- |
| $3 / 4 \mathrm{in} .(19 \mathrm{~mm})$ to $1-1 / 2 \mathrm{in} .(38 \mathrm{~mm})$ | $55 \mathrm{in} .-\mathrm{lb}$. |
| 2 in. $(51 \mathrm{~mm})$ to $4 \mathrm{in} .(102 \mathrm{~mm})$ | $75 \mathrm{in} .-\mathrm{lb}$. |

11. Remount the actuator on the bonnet assembly. Tighten the two set screws ( $50-60$ inch pounds).
12. Replace the damper crank arm assembly.
13. Re-attach the wires removed from the actuator terminals and turn on the electrical power.
14. With the gas still off, cycle the actuator to check for proper mechanical operation.

## $\triangle$ CAUTION

## Be sure to perform a bonnet seal and seat leak

 check after installation.Be sure to read and follow all instructions that come with the actuators, valves, seal and bonnet kits.
6. If the actuator leaked hydraulic fluid onto the valve (the fluid is red), it must be cleaned off from the valve and bonnet assembly.
a. Wipe off the outer valve body.
b. Remove the valve bonnet bolts and lift off the bonnet.

NOTE: V5055/V5097C and E Valves have additional internal springs that will push the bonnet up as the bolts are loosened.
c. Inspect the inside of the valve.

## IMPORTANT

If fluid is present on the inside surfaces of the valve body or bonnet surfaces, the bonnet assembly or entire valve must be replaced. See Table 8 below for the bonnet assembly part number.
d. If the inside surfaces are clear of hydraulic fluid, clean the bonnet assembly and be sure to remove all hydraulic fluid from the inside and outside of the actuator mounting curb. This is the "cup-like" area around the valve stem. Avoid using a cleaning solution as it may damage the rubber seals used in the valve.

## Table 8. Replacement Bonnets for V5055/V5097 Gas Valves.

| Replacement Bonnet | Valve |  | Valve Size (in in.) |
| :---: | :---: | :---: | :---: |
| 133398AA | $\begin{aligned} & \text { V5055A } \\ & \text { (On-Off) } \end{aligned}$ | V5097A | 3/4, 1, 1-1/4, 1-1/2 |
| 133417AA |  |  | 2, 2-1/2, 3 |
| 136911AA |  |  | 4 |
| 133398BA | V5055B | V5097B | 3/4, 1, 1-1/4, 1-1/2 |
| 133417BA |  |  | 2, 2-1/2, 3 |
| 136911BA | (Characterized Guide) |  | 4 |
| 133398CA | V5055C | V5097C | 3/4, 1, 1-1/4, 1-1/2 |
| 133417CA |  |  | 2, 2-1/2, 3 |
| 136911CA | (Proof of Closure) |  | 4 |
| 136308AA | V5055D | V5097D | 3/4, 1, 1-1/4, 1-1/2 |
| 136307AA |  |  | 2, 2-1/2, 3 |
| 136308BA | V5055E | V5097E | 3/4, 1, 1-1/4, 1-1/2 |
| 136307BA |  |  | 2, 2-1/2, 3 |

Each replacement assembly contains the bonnet assembly, two rubber seals, and a tube of grease. It must be used only on the type of valve indicated above.

Table 9. Gas Valve Replacement Seals.

| Replacement Seal <br> Assy \# | Valve Size (in in.) |
| :--- | :--- |
| 133393 A | $3 / 4,1,1-1 / 4,1-1 / 2$ |
| 133392 A | $2,2-1 / 2,3$ |
| 137253 A | 4 |

Fig. 6. Typical application of a V4055D/V5055C/V5097D or V4055E/V5055E/V5097E combination to meet Factory Mutual or Underwriters Laboratories Inc. approved requirements for Proof-of-Closure Switch (valve seal overtravel interlock).
